

Breach Action Steps

If you suspect that your security has been breached, there has been any unauthorized access to, or any fraud has occurred with respect to your Park Bank Business Online Banking account, you should:

1. Turn off the infected computer and disconnect it from your network.
2. Call Park Bank at 414-466-8000 immediately and ask for the Treasury Management department. We can start a process to re-secure your banking information. It is very important that this is done immediately.
3. If you are indeed a victim of fraud, call your local police department to report the crime.
